Patrick McCray on Making Art Work

Sunday, April 25 | 4:00 PM PDT

Can a work of art be an experiment? What distinguishes an artist from an engineer? On Sunday 25 April at 4pm, Prof. W. Patrick McCray, UCSB Historian of Science (and former engineer) will draw on his new book, *Making Art Work* (MIT, 2020), to portray how the barriers between engineers, scientists and artists

began to dissolve as they collaborated in the creation of new visually and sonically exciting multimedia works.

Sponsored by History Associates, our community support group, McCray's lecture is the last in a series of History Department events celebrating Alumni Week. Find the Zoom link [here](#).
